## II. SAFE Project

According to a telephone report from TRW, the meeting with Burroughs on 19 August went well. According to the TRW spokesman, "a thread of sanity" appears to be surfacing in the Burroughs approach to the problem. They were pleased to learn that NSA is planning to take five of the surplus computers (the dual 7800 and three 6900's) but indicated they expect the rest of the equipment to be similarly placed in the Intelligence Community. They include among the machines to be placed three 6900's not yet shipped to TRW, making the total to be placed (according to Burroughs) two 7800's and ten 6900's. With five requested by NSA and one already in use in DOD we have half the number allocated. NPIC is seriously considering the use of another 6900, and the IC Staff is seeking other possibly interested parties within the Community.

TRW learned that one reason why Burroughs doesn't want the computers returned is that they have repackaged the 6900 to make it much smaller, so the space-consuming versions which we have will shortly be a commercial liability. (It seems likely that the plans for this repackaging played a part in Burroughs heavy discounting of the equipment they bid for SAFE.)

Burroughs presented TRW with a list of termination costs totalling \$5M, but initial review led TRW to conclude that many of the claims were "laughable."

TRW and Burroughs will meet again in two or three weeks to discuss the termination claims, after their full evaluation by TRW and the Government.  25X1

## Section I: SUMMARY COMPARISON OF DOS AND CIA PROPOSALS

Various attempts have been made to "split the pie" in some clean, easily understandable and readily implementable fashion. DOS proposes that the split be made on the basis of Government owned and non-Government owned transmission systems. CIA sees the problem as being more complex. CIA views the integration of transmission systems, security requirements, traffic classifications and compartmentation, traffic volumes and priorities, availability and survivability as a multi-dimensional problem that does not lend itself to a simple either-or division of roles. Consequently, CIA proposes a split that, while more cumbersome to define, will clearly establish responsibility, eliminate ambiguity, and assure compatibility and efficiency. DOS proposes what is essentially separate networks with separate management. There is no defined process of coordination, no centralized control and no single point of management responsibility. CIA proposes a divided operational responsibility but a centralized management through a single architectural control. Since the CIA has the greater security requirement; a larger and more complex Government-controlled network; the greater need for rapid operational responsiveness, assured and survivable communications; and the demonstrated ability, this architectural and management control should be assigned to CIA.

*Negotiations are continuing however the major points on the subsequent page will be difficult to resolve and it may be necessary that the DCI and SEC State make the final decisions on these issues.*

COMPARISON OF <sup>Major</sup> ESSENTIAL POINTSCIA Sponsored Draft

- 1a. CIA will manage and operate all Government controlled systems, whether or not CIA traffic is carried in those systems. Operational responsibility may be delegated where no CIA traffic is carried.
- 1b. ←
- 2a. CIA will manage and operate all non-Government controlled systems that carry CIA traffic, whether or not DOS traffic is also carried in those systems.
- 2b. DOS will manage and operate all non-Government controlled systems that do not carry CIA traffic.
3. CIA will be responsible for overall architecture and management at para 1. and para 2a, locations. DOS has this responsibility elsewhere.

DOS Sponsored Draft

- 1a. CIA will manage and operate Government owned systems that carry CIA traffic. DOS will share this operation at small (undefined) posts.
- 1b. DOS may manage and operate Government owned systems that do not carry CIA traffic.
2. DOS will manage and operate all non-Government owned systems, whether or not CIA traffic is carried in those systems.
3. Each organization will separately design and manage those systems for which they have responsibility, i.e. CIA for Government owned and DOS for Non-Government owned.

MEMORANDUM FOR: See Distribution

SUBJECT : Report of Significant Activities During DCI's  
Absence (6-24 August 1982)

Please provide by COB 24 August for the Director's review a report of any significant activities you wish to call to his attention shortly after his return. The report may take the form of a blind memorandum inscribed across the top Significant Activities/Developments (Directorate or Office) and should be forwarded to the Executive Secretariat in two copies.
